**TO WHOM SO EVER IT MAY CONCERN**

**SUB: RECOMMENDATION LETTER FOR 'ITT' MAKE HYDRO-PNEUMATIC PUMPS.**

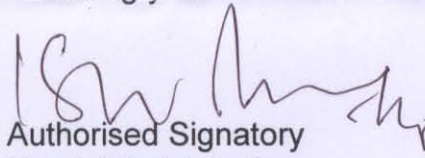

This is to certify that we have engaged M/s Aquatics for the installation of ITT LOWARA made HYDRO-PNEUMATIC<sup>®</sup> system of model: 4HM5-3.6m<sup>3</sup>/hr. @ 25 m (2 nos.) along with water transfer softener feed system of model: 2HM4-2.5m<sup>3</sup>/hr. @ 25m (2 nos.) in July 2010 at our site at Insignia Building, Sindhu Bhavan Road, Bodakdev-Ahmedabad,380059.

The AQUATICS team has successfully installed the pneumatic system. The system is meeting the performance as per the design and specifications. The pneumatic pumps along with its Disc filter and U.G and O.H. tank (with a submersible pump) have helped in providing water throughout the premises.

The AQUATICS service team has provided full cooperation in maintenance and back up for the units since July 2010. Their nature and approach is friendly and scientific. With an experienced team of efficient technicians, they have tackled all our problems, be it repair or maintenance.

Based upon the performance of the system and the service provided by ITT channel partner AQUATICS, we would recommend this product to all the prospective buyers.

Thanking you.
